Casper Hildebrand

Full-Stack Software Engineer

Amsterdam, Netherlands | casperhildebrand@gmail.com | cashil.github.io | github.com/cashil | linkedin.com/in/casper-hildebrand

Profile

Full-stack software engineer at Tikkie (ABN AMRO) building Tikkie Business, with a double Master's degree in Computer Science (Data Science) and Science Education from Delft University of Technology. Experienced across TypeScript, React, Node.js, AWS, and PostgreSQL. Interested in agentic engineering and AI-enabled software development workflows.

Experience

Tikkie (ABN AMRO) — Amsterdam, NL
Full Stack Software Engineer — Mar 2026 – Present

- Developing the merchant web portal and onboarding backend systems for Tikkie Business using TypeScript, React, and AWS.
- Engineering business payment request creation, transaction tracking, and account management features.
- Exploring agentic engineering and AI-assisted workflows across the software development lifecycle.

Harvest — Amsterdam, NL
Software Engineer – Young Talent Fellow — Feb 2026 – Present

- Following a post-MSc fellowship bridging academic research and production software engineering.
- Attending bi-weekly hands-on masterclasses on cloud systems, Temporal workflows, and agentic engineering.

Bitsized — Delft, NL
Co-Founder & Lead Engineer — Jan 2023 – Feb 2025

- Co-founded an educational platform with TU Delft peers to make computer science education accessible in Dutch high schools.
- Built an in-browser code evaluation sandbox using Web Workers and React, enabling students to run code safely client-side.

CSG De Lage Waard & Stanislascollege — South Holland, NL
Computer Science Teacher — Aug 2024 – Jul 2025

- Taught 10 high school classes (200 students total) in algorithms, digital logic, computer architecture, and web development.
- Supervised final-year student assignments and designed the regional programme of tests and examinations (PTA).

Netcompany — Delft, NL
Software Analyst & Software Consultant — Sep 2021 – Jun 2022

- Developed and maintained public sector projects for Vervangingsfonds and Participatiefonds; prepared workshops and user stories.
- Built a Dutch governmental sustainability assessment web tool for residential and commercial building efficiency.

Bexter — Delft, NL
Software Developer & Frontend Developer — Sep 2019 – May 2021

- Engineered backend features and APIs for TrackOnline, an asset management platform for supply chain containers and dollies.
- Maintained and developed customer-facing web interfaces using TypeScript, JavaScript, and HTML/CSS.

Education & Research

Delft University of Technology (TU Delft) — Delft, NL
MSc Computer Science (Data Science) & MSc Science Education — Sep 2021 – Jan 2025

- **Master's Thesis:** *Debugging the Divide: Exploring Men's and Women's Motivations and Engagement in Computer Science MOOCs.* Analyzed clickstream logs across 174,988 learners using k-means clustering in Python.
- Awarded formal Dutch first-degree (eerstegraads) teaching qualification in Computer Science.

KTH Royal Institute of Technology — Stockholm, Sweden
MSc Exchange – Computer Science — Aug 2022 – Jan 2023

- Completed coursework in Human-Computer Interaction, Information Visualization, and UX Design.

Delft University of Technology (TU Delft) — Delft, NL
BSc Computer Science & Engineering — Sep 2018 – Jul 2021

- Specialised in Data Science (data mining, machine learning). Served as student representative on the BSc Board of Studies.

Technical Competencies

Languages:	TypeScript, JavaScript, Python, SQL (PostgreSQL, MySQL), C#, HTML/CSS
Frontend:	React, Vite, Tailwind CSS, Web Workers, Next.js, Accessibility (a11y)
Backend & Cloud:	Node.js, Express, AWS (Lambda, S3, RDS), RESTful APIs, Docker
Data & Systems:	Relational Data Modeling, Clickstream Analysis, Pandas, Agentic Engineering, Temporal Workflows
Practices:	Git, GitHub Actions, CI/CD, Unit Testing (Vitest, Jest), Curriculum Design, Technical Writing
