Casper Hildebrand

Full-Stack Software Engineer

Amsterdam, Netherlands | casperhildebrand@gmail.com | cashil.github.io | github.com/cashil | linkedin.com/in/casper-hildebrand

Profile

Double Master's graduate from Delft University of Technology (Computer Science & Science Education). Full-stack software engineer at Tikkie (ABN AMRO) developing merchant payment APIs and business web portals. Solid background across TypeScript, React, Node.js, AWS serverless, PostgreSQL, and applied data analytics.

Experience

Tikkie (ABN AMRO) — Amsterdam, NL
Full Stack Software Engineer — Mar 2026 – Present

- Developed merchant payment APIs and business web applications for Tikkie Business, supporting thousands of enterprise merchants.
- Implemented idempotent payment settlement workflows, partner endpoints, and automated recovery mechanisms.
- Built responsive merchant analytics dashboards and reporting interfaces using React, TypeScript, Node.js, and AWS serverless infrastructure.

Harvest — Amsterdam, NL
Software Engineer – Engineering Fellow — Feb 2026 – Present

- Selected for engineering fellowship running parallel to high-throughput production at Tikkie.
- Participated in advanced cloud systems architecture, event-driven design, and system reliability engineering.

Bitsized — Delft, NL
Platform Co-Founder & Lead Engineer — Jan 2023 – Feb 2025

- Co-founded and engineered an interactive educational coding platform adopted by Dutch secondary school computer science departments.
- Architected in-browser code execution sandboxes, real-time evaluation feedback, and teacher assignment management tooling using TypeScript, React, Node.js, and Docker.

CSG De Lage Waard & Stanislascollege — South Holland, NL
Computer Science Teacher — Aug 2024 – Jul 2025

- Instructed ∼200 secondary school students across 10 cohorts in algorithms, computer architecture, digital logic, and web application fundamentals.
- Designed school graduation examination standards and structured course curricula for regional CS departments.

Netcompany — Delft, NL
Software Analyst & IT Consultant — Sep 2021 – Jun 2022

- Engineered ETL data migration workflows and technical specifications for national Dutch public sector funds (Vervangingsfonds & Participatiefonds).
- Built full-stack commercial property energy modeling tools according to statutory governmental regulations.

Bexter — Delft, NL
Software Developer — Sep 2019 – May 2021

- Engineered backend services and REST APIs for TrackOnline, an enterprise asset logistics platform managing reusable supply chain containers.
- Modernized customer-facing web portals with TypeScript and JavaScript, improving UI performance and reducing data loading latency.

Education & Research

Delft University of Technology (TU Delft) — Delft, NL
MSc Computer Science (Data Science) & MSc Science Education — Sep 2021 – May 2024

- **Master's Thesis:** *Debugging the Divide: Exploring Men's and Women's Motivations and Engagement in Computer Science MOOCs.* Analyzed clickstream logs across 174,988 learners using k-means clustering and statistical regression in Python/Pandas.
- Awarded formal Dutch first-degree teaching qualification (Eerste Graads) in Computer Science.

KTH Royal Institute of Technology — Stockholm, Sweden
Exchange Studies in Computer Science — Aug 2022 – Jan 2023

- Focused on machine learning algorithms, information visualization, and human-computer interaction.

Delft University of Technology (TU Delft) — Delft, NL
BSc Computer Science & Engineering — Sep 2017 – Jul 2021

- Core foundations in data structures, algorithms, operating systems, networking, and software engineering. BSc Board of Studies representative.

Technical Competencies

Languages:	TypeScript, JavaScript, Python, SQL (PostgreSQL, MySQL), C#, Java, Shell
Frontend:	React, Next.js, Vite, Tailwind CSS, HTML/CSS, Accessibility (a11y)
Backend & Cloud:	Node.js, Express, AWS (Lambda, S3, RDS, CloudFront), RESTful APIs, Microservices, Docker
Data & Systems:	Distributed Systems, Event-Driven Architecture, Clickstream Analytics, Pandas, Relational Modeling
Practices:	CI/CD (GitHub Actions), Unit & Integration Testing (Vitest, Jest), Git, Agile/Scrum, Technical Writing
