Casper Hildebrand

Full-Stack Software Engineer & Educator

Amsterdam, Netherlands | casperhildebrand@gmail.com | cashil.github.io | github.com/cashil | linkedin.com/in/casper-hildebrand

Profile

Full-stack software engineer at Tikkie Business (ABN AMRO via Harvest) with double Master's degrees in Computer Science and Science Education from Delft University of Technology. Experienced across TypeScript, React, Node.js, and AWS for merchant onboarding and payout workflows. Combines technical rigor with pedagogical clarity to craft maintainable software and help teammates thrive.

Experience

Tikkie Business (ABN AMRO · via Harvest) — Amsterdam, NL
Software Engineer — Feb 2025 – Present

- Developing merchant-facing web applications in TypeScript and React for payment requests, transactions, and business operations.
- Building backend onboarding workflows and services on AWS to automate business client verification and activation.
- Supporting payout processing pipelines to ensure merchant settlements flow accurately and on schedule.

Bitsized — Delft, NL
Co-Founder & Lead Frontend Engineer — Jan 2023 – Feb 2025

- Co-founded an educational platform for Dutch secondary schools; worked directly with teachers to understand classroom needs.
- Built an accessible web application with Vue.js and the Meteor framework, enabling students to code in-browser with zero local setup.
- Designed straightforward assignment distribution and friendly student feedback tools to keep students engaged without cryptic errors.

CSG De Lage Waard & Stanislascollege — South Holland, NL
Computer Science Teacher — Aug 2024 – Jul 2025

- Taught 10 high school classes (200 students total) in algorithms, digital logic, computer architecture, and web development.
- Supervised final-year student assignments and designed the regional programme of tests and examinations (PTA).

Netcompany — Delft, NL
Software Analyst & Software Consultant — Sep 2021 – Jun 2022

- Developed and maintained public sector applications for Vervangingsfonds and Participatiefonds; prepared workshops and user stories.
- Built a Dutch governmental sustainability assessment web tool for residential and commercial building efficiency.

Bexter — Delft, NL
Software Developer — Sep 2019 – May 2021

- Engineered backend features and REST APIs for TrackOnline, an asset management platform for logistics and supply chain containers.
- Maintained and modernized customer-facing web interfaces using TypeScript, JavaScript, and HTML/CSS.

Education & Research

Delft University of Technology (TU Delft) — Delft, NL
MSc Computer Science & MSc Science Education — Sep 2021 – Jan 2025

- **Master's Thesis:** *Debugging the Divide: Exploring Men's and Women's Motivations and Engagement in Computer Science MOOCs.* Investigated learner engagement to develop pedagogical recommendations for inclusive instruction.
- Awarded formal Dutch first-degree (eerstegraads) teaching qualification in Computer Science.

KTH Royal Institute of Technology — Stockholm, Sweden
MSc Exchange – Computer Science — Aug 2022 – Jan 2023

- Coursework in Human-Computer Interaction, Information Visualization, and User Experience Design.

Delft University of Technology (TU Delft) — Delft, NL
BSc Computer Science & Engineering — Sep 2018 – Jul 2021

- Coursework in software engineering, algorithms, systems, and databases. Served as student representative on the Board of Studies.

Technical Competencies

Languages:	TypeScript, JavaScript, Python, SQL (PostgreSQL, MySQL), C#, HTML/CSS
Frontend:	React, Vue.js, Vite, Tailwind CSS, Next.js, Web Workers, Accessibility (a11y)
Backend & Cloud:	Node.js, Meteor, Express, AWS (Lambda, DynamoDB, S3), RESTful APIs, Docker
Databases & Arch:	PostgreSQL, MySQL, MongoDB, Relational Data Modeling, Event-Driven Systems
Practices:	Git, GitHub Actions, CI/CD, Unit Testing (Vitest, Jest), Curriculum Design, Mentorship
